

ProArc provides ONE-STOP-SHOP high quality, metal cutting machines and our focus has been on the metal work market since 1966. We manufacture CNC oxy-fuel, plasma and laser cutting machines with ProArc water table, fume extraction table and dust collectors available to offer a complete solution.

**Athlete**

The ProArc Athlete is a compact, industrial cutting system designed for productive, high precision cutting applications. Most popular size is 5'x10', 6'x12', and 6'x20'.

**Master**

The ProArc Master is the industrial cutting solution for steel industries, ship building and steel service centers. It operates perfectly in the most demanding factories.

**Magicut**

The ProArc Magicut is an affordable CNC cutting table, ideal for workshop and steel industries. Available size is 4'x4', 4'x8' and 5'x10'.

**Pipe & Tube CNC Cutting Machine**

ProArc offers equipment for processing of pipe and tube cutting. Available for processing of 3D rotary objects and structural steel sections of various shapes too.

**Cutting Table and Dust Collectors**

ProArc high efficiency cutting tables provide many advantages such as quick clean, long life and energy saving. Addition of a ProArc nanofiber filter dust collector creates a clean and safe working environment.

**Bevel cutting head X-cut**

The ProArc X-cut offers fully automatic plasma bevel cutting. It is designed for easy operation and simplified alignment, giving maximum results.
